

Almonti Jourdan Manuputty

Full Stack Developer/ Software Developer

Jakarta, Indonesia | +6285882450419 | almontimanuputty@gmail.com | [LinkedIn](#) | [Github/Portfolio](#)

SUMMARY

A logistics professional turned Fullstack Developer with a passion for building web applications. Began my coding journey by enrolling in the Hacktiv8 Full Stack JavaScript bootcamp, determined to transition from a career in freight forwarding and logistics into the tech industry. With a background in Industrial Engineering and over two years of experience in supply chain and transportation, I bring a problem-solving mindset, analytical thinking, and adaptability to software development.

EDUCATION

Hacktiv8

Full Stack JavaScript Immersive Program ([Transcript](#))

Jakarta, Indonesia

December 2024 – April 2025

Gunadarma University

Bachelor of Industrial Engineering (GPA 3.31/4.00)

Jakarta, Indonesia

2015 – 2020

WORK EXPERIENCE

Abadimitra Andhika

Sales Operations

Jakarta, Indonesia

March 2024 – November 2024

- Managed domestic, export, and import shipments across sea and land logistics, ensuring timely delivery with 98% on-time rate.
- Calculated quotations and pricing with accurate cost analysis, reducing pricing errors by 20% compared to the previous quarter.
- Coordinated order fulfillment and container scheduling, handling up to 50+ containers per month.
- Acquired and maintained relationships with over 30 active B2B clients, contributing to a 15% revenue increase during tenure.
- Collaborated with operations and documentation teams to streamline communication and resolve shipment issues within 24 hours.

M+R Forwarding Indonesia

Sales Executive

Jakarta, Indonesia

January 2024 – March 2024

- Oversaw end-to-end logistics for domestic, export, and import cargo, including both FCL and LCL shipments.
- Developed competitive quotations and pricing strategies that helped win 10+ new clients in the first quarter.
- Managed order tracking and container allocation for up to 40 monthly shipments, improving lead time accuracy by 25%.
- Built long-term relationships with corporate clients, resulting in a 20% repeat business rate.
- Conducted market analysis and presented logistics solutions, contributing to branch growth in Eastern Indonesia.

Proteus Mitra Logistic

Sales Executive

Jakarta, Indonesia

July 2022 – January 2024

- Handled sales and operations for local and international freight forwarding, managing documentation and permits for customs clearance.
- Created cost-effective proposals and pricing that improved profit margins by 18%.
- Monitored container bookings and shipment schedules, achieving a 95% dispatch accuracy rate.
- Onboarded 25+ new clients through targeted outreach and cold calling, exceeding quarterly sales target by 30%.
- Represented the company in logistics expos and networking events to expand business presence in the Jakarta area.

SKILLS

FullStack Developer :

Language: JavaScript

Front End: React JS, Redux, Vite, React Native, NextJS, HTML & CSS, Apollo Client, Expo,

Back End: Node JS, Express, Sequelize, PostgreSQL, GraphQL, Apollo Server, MongoDB, Redis, Rest API

PROJECTS

Jolt Jordan

March 2025

Built a mobile and web-based job portal platform similar to JobStreet or LinkedIn, featuring AI-powered CV feedback, optimization, generation, and Telegram chatbot for personalized job alerts.

Tech stack: Next JS, MongoDB, GraphQL, TypeScript, Vercel

Oarl

March 2025

Developed an e-commerce platform for reusable drink bottles with integrated product pages, cart system, and responsive design across web and mobile.

Tech stack: Next JS, MongoDB, GraphQL, TypeScript, Vercel

Sparkles

March 2025

Engineered a mobile photo-sharing application inspired by Instagram, with features like post uploads, user profiles, and real-time updates using Redis.

Tech stack: React Native, React, GraphQL, Apollo Server, Redis, Expo, MongoDB

Queezy

March 2025

Created a web-based word game where users could select quiz categories and receive dynamically generated questions powered by Gemini AI, using 3rd party APIs for validation and Redux for game state management.

Tech stack: React JS, Express JS, Redux, 3rd party API for server-side, PostgreSQL

Flex

March 2025

Built a fitness-focused web and mobile application that fetched and displayed exercises from the ExerciseDB API, allowing users to search and filter routines.

Tech stack: React JS, Redux, React, Express JS, Apollo Server, PostgreSQL
